

The environmentally sound continuous cannabis fertility program from Aminorganix, the leader in sustainable solutions for growth.

Ask growers and they will tell you it's critical to manage growth from seedling or cutting stage, to vegetative, early and late bloom through harvest. That's why the Aminorganix continuous fertility program is formulated with seven nitrogen sources, seven phosphorus and seven potassium sources to provide feeding that can last for more than three months. There's calcium, sulfur and essential micro and macro ingredients for optimum growth.

POSITIONALLY STABLE IN THE SOIL

9-3-7 creates a microclimate around the plant to help keep nutrients in the root zone longer to support every growth stage. 9-3-7 is organic with unique cation and thixotropic properties to release nutrients uniformly over time with microorganism activity and irrigation. From seed through harvest, Aminorganix is a whole new way to grow.

FULL NUTRITION PROGRAM

Feeding bacteria, mycorrhizae and other beneficial microorganisms is key to nutrient utilization. 9-3-7 enhances the symbiotic relationship with the plant while attracting and feeding billions of CFU's (Colony Forming Units) of beneficial microorganisms and mycorrhizae, increasing root mass and strengthening the plant throughout the growing cycles.

IT'S ALL ABOUT THE LABEL

Guaranteed Analysis

Total Nitrogen(N)	9.00%
9.00% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	3.00%
Soluble Potash (K ₂ O)	7.00%
Calcium (Ca)	2.80%
Total Magnesium (Mg)	0.30%
0.18% Water Soluble Magnesium	
Sulfur (S)	4.10%
3.40% Combined Sulfur(S)	
0.70% Free Sulfur(S)	
Boron (B)	0.02%
Cobalt (Co)	0.0005%
Iron (Fe)	1.25%
1.25% Water Soluble Iron	
Total Manganese (Mn)	0.30%
0.08% Water Soluble Manganese	
Molybdenum (Mo)	0.0005%
Zinc (Zn)	0.10%

Ingredients

Feather meal, poultry meal, wheat middlings, soybean meal, corn gluten meal, alfalfa meal, molasses, sulphate of potash, dolomitic limestone, elemental sulfur, cobalt sulfate, iron sulfate, manganese sulfate, zinc sulfate, sodium borate, sodium molybdate. *9.0% slowly available Nitrogen from feather meal, wheat middlings, soybean meal, alfalfa meal, corn gluten meal, molasses.

NO MANURES, NO FILLERS, MADE TO FEED GRADE STANDARDS FOR MAXIMUM SAFETY

Aminorganix and every one of our field specialists is committed to providing environmentally responsible products which will help keep your plants growing healthy with feed grade fertilizers for maximum safety to all workers.

We specialize in Integrated Cannabis Management, the scientific approach to nutritional product selection to stimulate the natural biological processes in your soil to help you produce a healthy, productive plants from seed to flush. We believe that healthy soil and plants will be better able to resist disease, force out weeds and produce the characteristics you require for optimum nutrition throughout the growth cycle.

FORMULATED TO CONTINUOUSLY FEED FOR MONTHS

PROFESSIONAL AGRONOMIC MANAGEMENT

Our experienced and expert staff and our regional field specialists are here to help. Learn more about our products and how they help you grow healthier plants without harming the environment.
