

The environmentally sound specialty agriculture program from AminOrganix, the leader in sustainable solutions for growth.

Ask any commercial growing professional. They want healthy plants and a safe and reliable way to fertilize without specialized labor or instructions. That's what 9-3-7 is, quality organic fertilizer used to grow a variety of fruits and vegetables. Aminorganix is a great way to start seeds, transplant seedlings and provide controlled release, often one application for growth from seed to sale. We help build beautiful productive plants for commercial growers because we build plants from the ground up.

CONTINUOUS FEEDING PROGRAM

Aminorganix feeds plants continuously, formulated with seven nitrogen sources, seven phosphorus and seven potassium sources to provide feeding that can last for more than three months. Calcium, sulfur and essential micro and macro ingredients enhance performance for optimum growth. 9-3-7 is organic and it stays in the root zone longer than synthetics using its unique cation and thixotropic properties to provide nutrients uniformly with irrigation.

FULL NUTRITION PROGRAM

Feeding the bacteria, mycorrhizae and other beneficial microorganisms is key to nutrient utilization. 9-3-7 enhances the symbiotic relationship with the plant while attracting and feeding billions of CFU's of beneficial microorganisms and mycorrhizae, increasing root mass and strengthening plants from seed and throughout the growing season.

IT'S ALL ABOUT THE LABEL

Guaranteed Analysis

Total Nitrogen(N)	9.00%
9.00% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	3.00%

Zinc (Zn)	0.10%

Ingredients

Feather meal, poultry meal, wheat middlings, soybean meal, corn gluten meal, alfalfa meal, molasses, sulphate of potash, dolomitic limestone, elemental sulfur, cobalt sulfate, iron sulfate, manganese sulfate, zinc sulfate, sodium borate, sodium molybdate. *9.0% slowly available Nitrogen from feather meal, wheat middlings, soybean meal, alfalfa meal, corn gluten meal, molasses.

NO MANURES, NO FILLERS, MADE TO FEED GRADE STANDARDS FOR MAXIMUM SAFETY
Aminorganix and every one of our field specialists is committed to providing environmentally responsible products which will help keep the plants and the areas they are grown in healthy and safe.

We specialize in Integrated Plant Management, the scientific approach to nutritional product selection to stimulate the natural biological processes in your soil or planters to help produce healthy, durable plants, shrubs and trees. Healthy plants are better able to resist disease, force out weeds and produce the characteristics you require for satisfied customers. Aminorganix organic nitrogens help ensure fewer problems from application errors.

FORMULATED TO CONTINUOUSLY FEED FOR MONTHS

Residual nitrogen in the soil from seasonal feeding, and the environmental nitrogen provided by mulched grass clippings, exhaust emissions, microorganisms, root growth, worm castings, lightning, and other sources.

PROFESSIONAL AGRONOMIC MANAGEMENT

Our experienced and expert staff and regional field specialists are here to help. Learn more about our products and how they help you grow healthier plants without harming the environment.
