

AMINORGANIX® 9-3-7 ORGANIC FERTILIZER

120-150 DAY RELEASE

For use on all garden plants,
flowers, hemp and shrubbery

Specifically formulated to supplement the natural food supply in the soil, **AMINORGANIX®** fertilizers are made exclusively from natural, organic and food grade sustainable elements. Broadly focused on not only present nutrient requirements, **AMINORGANIX** is developed to provide for future needs as well.

IMPROVING THE SOIL

AMINORGANIX organic fertilizers help create an ideal soil environment, which increases root mass and provides complete plant nutrition. Essential carbohydrates, basilicus package, vitamins and amino acids ensure the plants will export their own carbohydrates and other nutrients back into the microclimate around the plant root zone. That enhances the soil while using up to 30% less water, all the while sequestering CO₂.

BENEFITS OF AMINORGANIX

- Fast-acting delivery and enhanced root uptake
- Rigorous quality control manufacturing process
- Contains no manure (no unwanted E.coli, Salmonella, etc.)
- 120 - 150 day release
- May be applied using drop-spreader, broadcaster or by hand
- Aids in CO₂ sequestration
- Features an ideal package of vitamins and bacilicus

AMINORGANIX® 9-3-7 ORGANIC FERTILIZER

PRODUCT SPECIFICATIONS

Safe, high-performing Professional Grade blend of N-P-K along with basilicus package, carbohydrates, vitamins and amino acids

GUARANTEED ANALYSIS

Total Nitrogen (N)	9.00%
9.00% Water-Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₂).....	3.00%
Sodium Potash (K ₂ O).....	7.00%
Calcium (Ca).....	2.00%
Sulfur (S).....	4.10%
3.30% Combined Sulfur (S)	
0.80% Free Sulfur (S)	
Boron (B).....	0.02%
Iron (Fe).....	1.25%
Molybdenum (Mo).....	0.0005%
Zinc (Zn).....	0.06%

AminOrganix fertilizers give you 2x to 10x more microorganisms than any synthetic, natural or organic fertilizer, soil conditioner or activator.

MANUFACTURED TO FDA FEED GRADE STANDARDS

Manufactured in FDA feed mills using food grade materials and organic-rated sources of N, P and K. Produced at the same high standard as commercial food processing. Not intended for human consumption, but harmless to animals and humans.

BETTER OVERALL RESULTS

AMINORGANIX® provides sustainability and frees up non-available phosphates in the soil. An ideal plant food, it's a prime source of protein/nitrogen for all the microorganisms that feed the plant. Reduces unwanted mold, algae and fungus. Increases CO₂ capture.

Fortified From:
Hydrolyzed Feather Meal,
Corn Gluten Meal, Poultry
Meal, Soybean Meal,
Sulfate of Potash,
Iron Sulfate, Molasses,
Sodium Borate

Directions for Use:
Apply at the rate of 10 lb
per 1,000 sq ft.
