

The environmentally sound continuous cannabis fertility program from AminOrganiX; the leader in sustainable solutions for growth.

Growers will tell you it is critical to manage growth from seedling through harvest. AminOrganiX continuous fertility program is formulated with seven nitrogen, seven phosphorus and seven potassium sources - feeding plants continuously for more than three months. Calcium, sulfur and essential micro and macro ingredients provide what's needed for optimum growth. .

POSITIONALLY STABLE IN THE SOIL

9-3-7 creates a microclimate around the plant to help keep nutrients in the root zone longer and support every stage of growth. 9-3-7 is organic with unique cation and thixotropic properties releasing nutrients uniformly over time with microorganism activity and irrigation. From seed through harvest, AminOrganiX is a whole new way to grow.

FULL NUTRITION PROGRAM

Feeding bacteria, mycorrhizae and other beneficial microorganisms is key to nutrient utilization. 9-3-7 enhances the symbiotic relationship with the plant while attracting and feeding billions of CFU's (Colony Forming Units). These beneficial microorganisms and mycorrhizae increase root mass and strengthen plants throughout the growing cycle.

IT'S ALL ABOUT THE LABEL

Guaranteed Analysis

Total Nitrogen(N)	9.00%
9.00% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	3.00%
Soluble Potash (K ₂ O)	7.00%
Calcium (Ca)	2.80%
Total Magnesium (Mg)	0.60%
0.60% Water Soluble Magnesium	
Sulfur (S)	4.10%
3.40% Combined Sulfur(S)	
0.70% Free Sulfur(S)	
Boron (B)	0.02%
Cobalt (Co)	0.0005%
Iron (Fe)	1.25%
1.25% Water Soluble Iron	
Total Manganese (Mn)	0.30%
0.08% Water Soluble Manganese	
Molybdenum (Mo)	0.0005%
Zinc (Zn)	0.10%

Ingredients

Feather meal, poultry meal, wheat middlings, soybean meal, corn gluten meal, alfalfa meal, molasses, sulphate of potash, dolomitic limestone, elemental sulfur, cobalt sulfate, iron sulfate, manganese sulfate, zinc sulfate, sodium borate, sodium molybdate.

*9.0% slowly available Nitrogen from feather meal, wheat middlings, soybean meal, alfalfa meal, corn gluten meal, molasses.

NO MANURES, NO FILLERS, MADE TO FEED-GRADE STANDARDS FOR MAXIMUM SAFETY

AminOrganiX and our field specialists are committed to helping keep your plants growing healthy with environmentally responsible, feed-grade fertilizers for maximum performance and worker safety.

We specialize in Integrated Cannabis Management; the scientific approach to nutritional product selection that stimulates the natural biological processes in your soil. AminOrganiX 9-3-7 helps you produce healthy, productive plants from seed to flush. We believe healthy soil is better able to resist disease, force out weeds and provide optimum nutrition throughout the growth cycle - producing the plant characteristics you require.

FORMULATED TO CONTINUOUSLY FEED FOR MONTHS

PROFESSIONAL AGRONOMIC MANAGEMENT

Our experienced, expert staff and our regional field specialists are here to help. Learn more about our products and how they help you grow healthier plants without harming the environment.
