

AMINORGANIX[®]
SUSTAINABLE SOLUTIONS FOR GROWTH

EQUESTRIAN TURF PROFESSIONAL

POLO FIELDS, HORSE RACING

The Polo Field and Equestrian turf management program for deep rooted, dense, and durable quality turf from AminOrganix, the leader in sustainable solutions for growth.

Polo fields and equestrian racing need their turf to be deep rooted, dense, with a firm surface not only for tight turns, but to be safer for the horse and rider alike. AminOrganix is the preferred way to rejuvenate or establish new fields and tracks that will endure the toughest play. Organic 9-3-7 is the highest quality and best performing turf fertilizer synthetic or organic. 9-3-7 provides 7 separate sources of nitrogen and phosphorus as well as highest quality potassium to ensure firmness through plant turgidity. Dense, deep rooting provides quick recovery from "Divot Stomps" or routine track maintenance.

CONTINUOUS FEEDING PROGRAM

AminOrganix feeds turf continuously, formulated with seven nitrogen sources, seven phosphorus and seven potassium sources to provide feeding that can last for more than three months. Calcium, sulfur and essential micro and macro ingredients enhance performance for optimum growth. 9-3-7 is organic and it stays in the root zone longer than synthetics using its unique cation and thixotropic properties to provide nutrients uniformly with irrigation.

FULL NUTRITION PROGRAM

Feeding the bacteria, mycorrhizae and other beneficial microorganisms is key to nutrient utilization. 9-3-7 enhances the symbiotic relationship with the plant while attracting and feeding billions of CFU's of beneficial microorganisms and mycorrhizae, increasing root mass and strengthening the turf throughout the growing season.

Ingredients

Feather meal, poultry meal, wheat middlings, soybean meal, corn gluten meal, alfalfa meal, molasses, sulphate of potash, dolomitic limestone, elemental sulfur, cobalt sulfate, iron sulfate, manganese sulfate, zinc sulfate, sodium borate, sodium molybdate. *9.0% slowly available Nitrogen from feather meal, wheat middlings, soybean meal, alfalfa meal, corn gluten meal, molasses.

NO MANURES, NO FILLERS, MADE TO FEED GRADE STANDARDS FOR MAXIMUM SAFETY.
A new type of organic, all AminOrganix products are made from the same animal feed grade ingredients used in the finest animal feeds including those fed to horses. We are committed to sustainability in our ingredients, manufacturing and packaging.

AminOrganix and every one of our field specialists is committed to providing environmentally responsible products which will help keep the lawns and other landscape areas healthy and safe.

INTEGRATED TURF MANAGEMENT

We specialize in Integrated Turf Management, the scientific approach to nutritional product selection to stimulate the natural biological processes in your soil and turf to help produce a healthy, durable competition surface. Healthy turf will be better able to resist disease, force out weeds and produce the characteristics you require for satisfied customers.

FORMULATED TO CONTINUOUSLY FEED FOR MONTHS

PROFESSIONAL AGRONOMIC MANAGEMENT
