

TOTAL COURSE FERTILITY PROGRAM

The environmentally sound turf management program to establish, maintain and renovate greens, tees and fairways to provide tournament quality turf.

Tournament quality turf is all about a program that builds healthy tough turf from the root up. Aminorganix products are a key part of any program from establishing new greens, tees, and fairways, to renovation and providing day to day fertility. Our products are safe around worker and player alike with an ease of application that helps ensure anyone can apply it right the first time. We help build renovate and maintain beautifully playable, tournament-tough surfaces any golfer will take seriously from the ground up.

FOUNDATION AND RENOVATION PROGRAM

The difference is in the label. The key is seven different sources of N, P, and K, that provide nutrition for months. Our 9-3-7 is formulated to establish a strong base which permits greens to handle heavy wear and climactic stress that often cause damage. 9-3-7 is a high potassium diet, for maximum root growth with supplemental calcium and magnesium for stiffer, more resilient turf.

FULL NUTRITION PROGRAM

Feeding the bacteria, mycorrhizae and other beneficial microorganisms is key to nutrient utilization. 9-3-7 enhances the symbiotic relationship with the plant while attracting and feeding billions of CFU's of beneficial microorganisms and mycorrhizae, increasing root mass and strengthening the turf throughout the growing season.

IT'S ALL ABOUT THE LABEL

Guaranteed Analysis

Total Nitrogen(N)	9.00%
9.00% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅)	3.00%
Soluble Potash (K ₂ O)	7.00%
Calcium (Ca)	2.80%
Total Magnesium (Mg)	0.30%
0.18% Water Soluble Magnesium	
Sulfur (S)	4.10%
3.40% Combined Sulfur(S)	
0.70% Free Sulfur(S)	
Boron (B)	0.02%

Total Manganese (Mn)	0.30%
0.08% Water Soluble Manganese	
Molybdenum (Mo)	0.0005%
Zinc (Zn)	0.10%

Ingredients

Feather meal, poultry meal, wheat middlings, soybean meal, corn gluten meal, alfalfa meal, molasses, sulphate of potash, dolomitic limestone, elemental sulfur, cobalt sulfate, iron sulfate, manganese sulfate, zinc sulfate, sodium borate, sodium molybdate. *9.0% slowly available Nitrogen from feather meal, wheat middlings, soybean meal, alfalfa meal, corn gluten meal, molasses.

NO MANURES, NO FILLERS, FEED GRADE INGREDIENTS FOR MAXIMUM SAFETY

Aminorganix and every one of our field specialists is committed to providing environmentally responsible products which will help keep the golf course green, healthy and safe.

We specialize in Integrated Turf Management, the scientific approach to nutritional product selection to stimulate the natural biological processes in your soil to help you produce a healthy, durable playing surface. Healthy turf will be better able to resist disease, force out weeds and produce the characteristics you require for optimum course playing conditions.

FORMULATED TO CONTINUOUSLY FEED FOR MONTHS

Residual nitrogen in the soil from seasonal feeding, and the environmental nitrogen provided by mulched grass clippings, exhaust emissions, microorganisms, root growth, worm castings, lightning, and other sources.

PROFESSIONAL TURF MANAGEMENT

Our experienced expert staff and national field specialists are here to help. Learn more about our products and how they can become part of your program, to help you grow healthier turf without harming the environment.
